ST1 Spray Gun

POWER-SPRAYS

ST1 SPRAY GUN

The Power-Sprays ST1 Spray Gun is designed for the smooth application of facing coats on GRC panels and other cement based materials.

A range of spray tips is available starting at 6 mm through to 9.5 mm.

Standard ST1 Spray Guns are fitted with the traditional Power-Sprays slotted nozzle assembly, which injects the air just behind the spray tip. Alternatively, Power-Sprays MAM system (Minimum Air Mix) can be supplied as an optional extra. The MAM system injects the air through small holes in the spray tip, which improves atomisation.

For more detailed information and product specification, please contact your local agent or our UK based sales team.
